

Technical Consulting and Product Management

THE COMPANY

Fluxim is a provider of device simulation software to the display, lighting and photovoltaics industries worldwide. Our principal activity is the development and the marketing of the simulation software SETFOS which was designed to simulate light propagation and charge transport in large-area opto-electronic devices such as organic light-emitting diodes (OLEDs) and thin film solar cells (organic and inorganic). Our software products are used worldwide in industrial and academic research labs for the development of devices and semiconducting materials with improved performance as well as the study of device physics, respectively. Fluxim is a start-up company that combines expertise in physics, numerical methods and software development.

YOUR MAIN RESPONSIBILITIES

Due to increasing demand we look for a physicist for technical consulting and product management. The job involves the following responsibilities:

- Technical consulting and support for the software end-users
- Provide software training to end-users and distribution partners and develop training material
- Provide presentations at scientific and technical conferences as well as software training workshops
- Support the sales and marketing processes and visit key customers and distribution partners
- Contribute to and collaborate in international R&D projects
- Provide inputs and feedback to the software development engineers
- Develop physical models for optical and electronic device simulation products
- Test and control the quality of our products

QUALIFICATIONS

The ideal candidate has a university degree in Physics at Master or PhD level and professional experience in organic electronics R&D both experimentally and by means of simulation. Relevant experience in key research areas such as optics, semiconductor physics and organic electronics is a plus. We look for a motivated scientist or engineer, that enjoys working in an international setting in a dynamic start-up and contribute to this growing high-tech market. The candidate must be proficient in English and German.

OUR OFFER

We offer an exciting job in a challenging working environment in the vicinity of Winterthur and Zurich, Switzerland, in a young, highly motivated team. Your work can directly impact the company's success. Compensation is defined in dependence of the candidate's qualification and work performance. For more information please visit www.fluxim.com and contact Prof. Dr. Beat Ruhstaller.
